

Setting up the Spring Boot

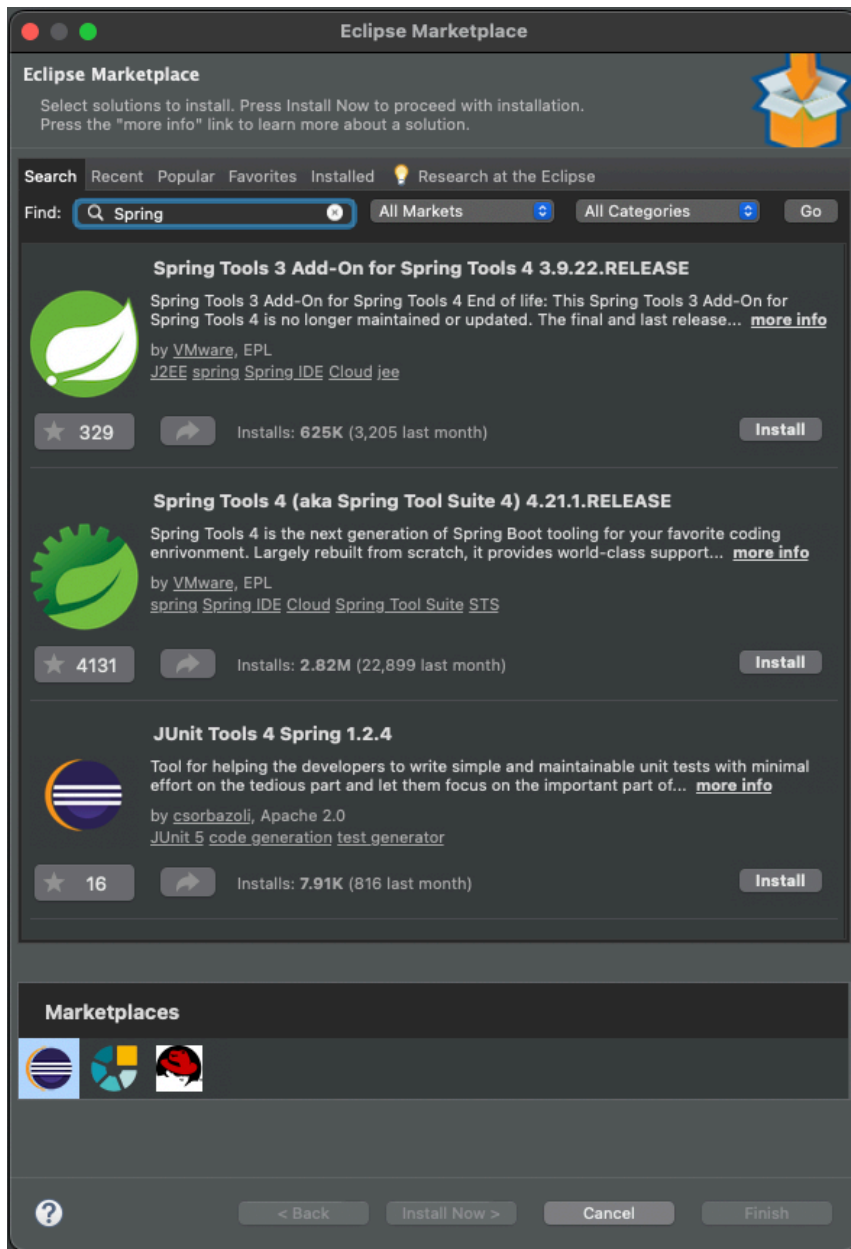

1. Adding Spring Tools 4 extension from Eclipse Marketplace
 - Select “Help” -> “Eclipse Marketplace”

- An Eclipse Marketplace interface will appear

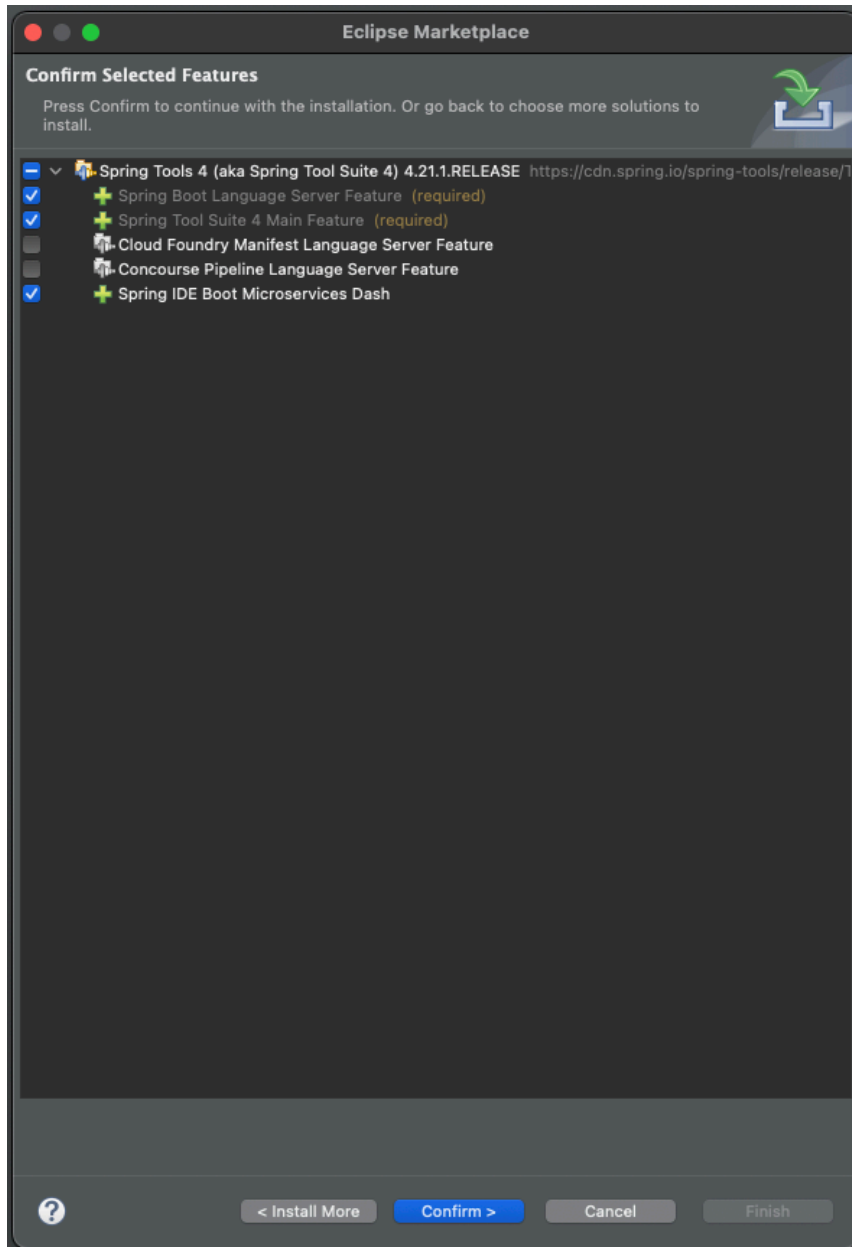

2. Type in "Spring" and do search

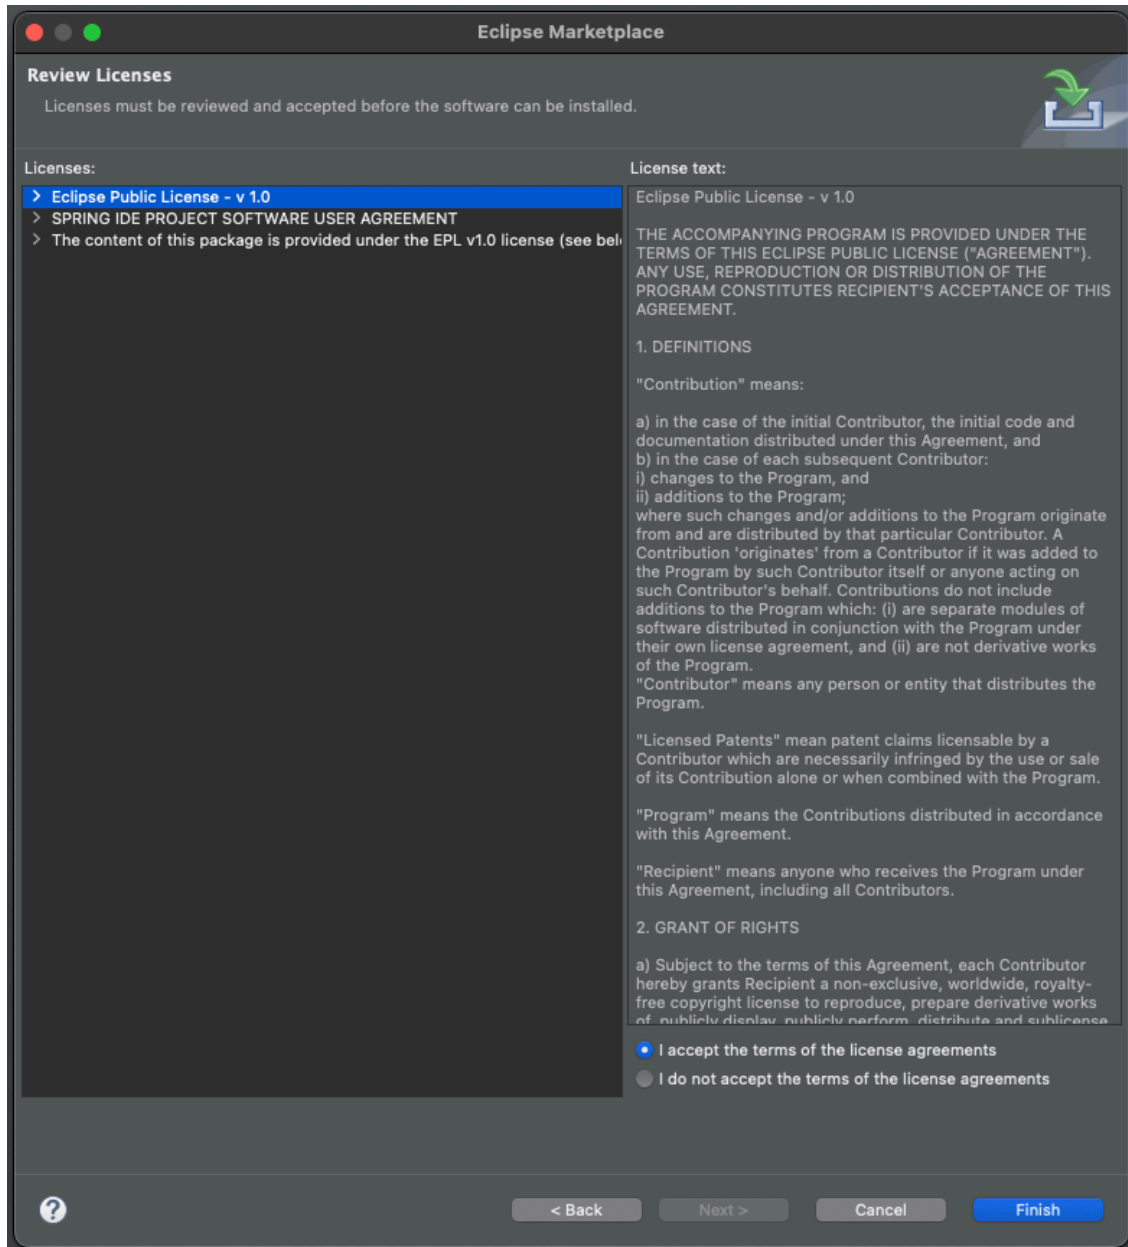

3. We are going to install "Spring Tools 4"
4. Click the "Install" button

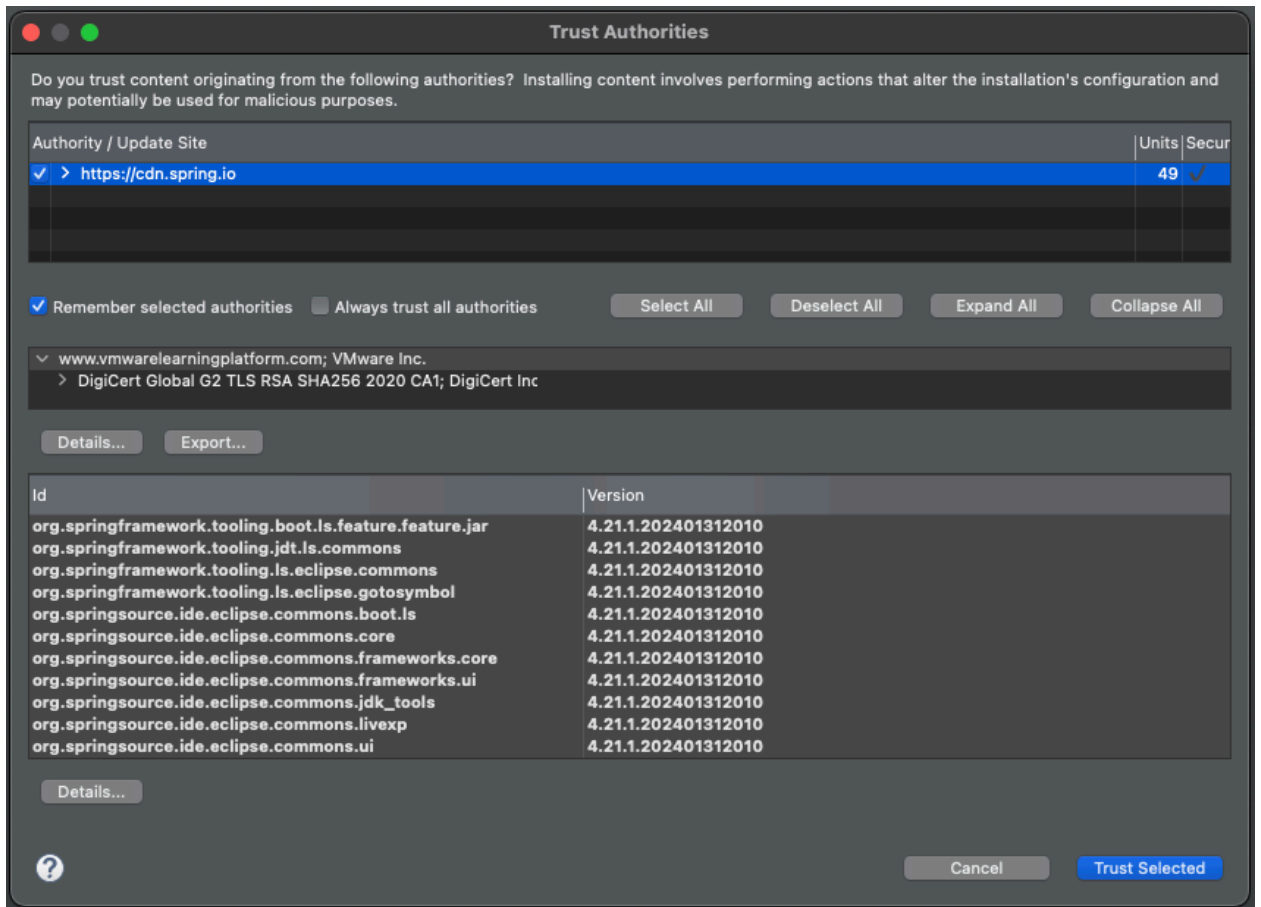

5. A Confirm Selected Features interface will appear
6. Use the default selection and click "Confirm"

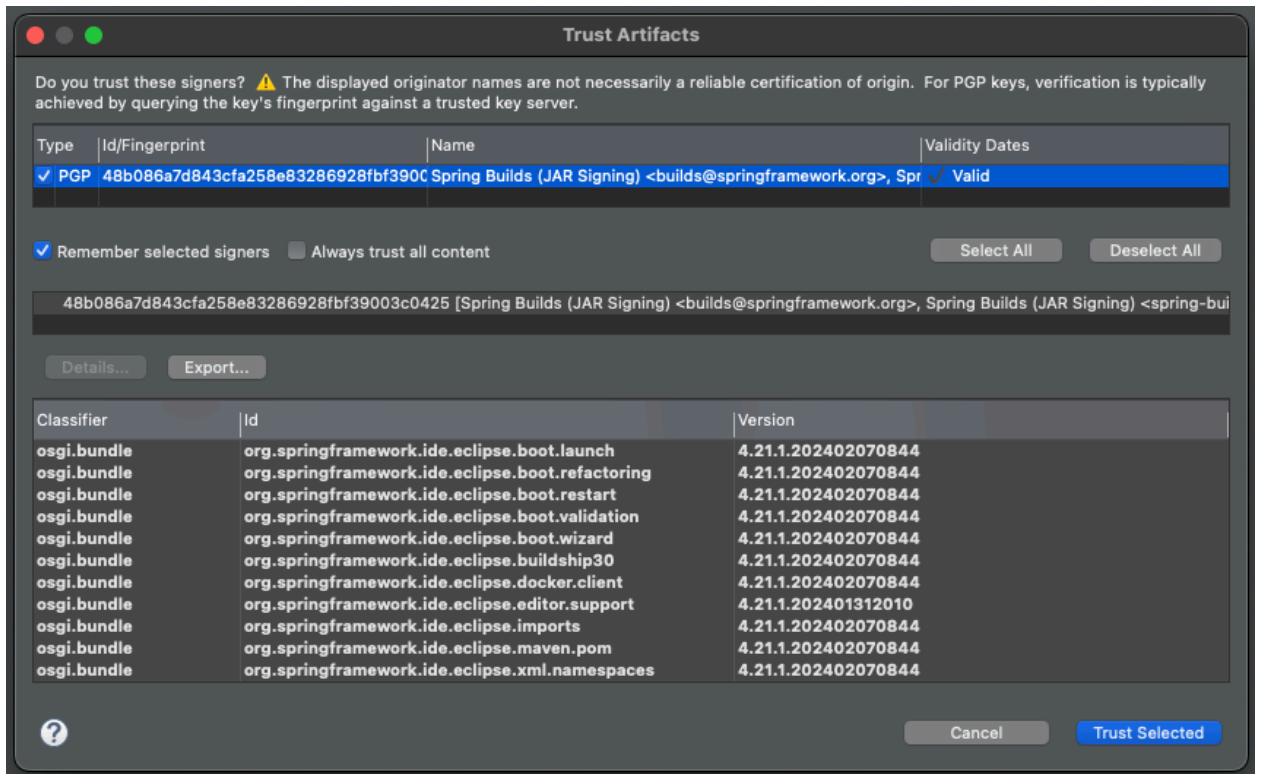

7. Click on “I accept the terms of the license agreements” and then “Finish”; It may take some time for all the download and install

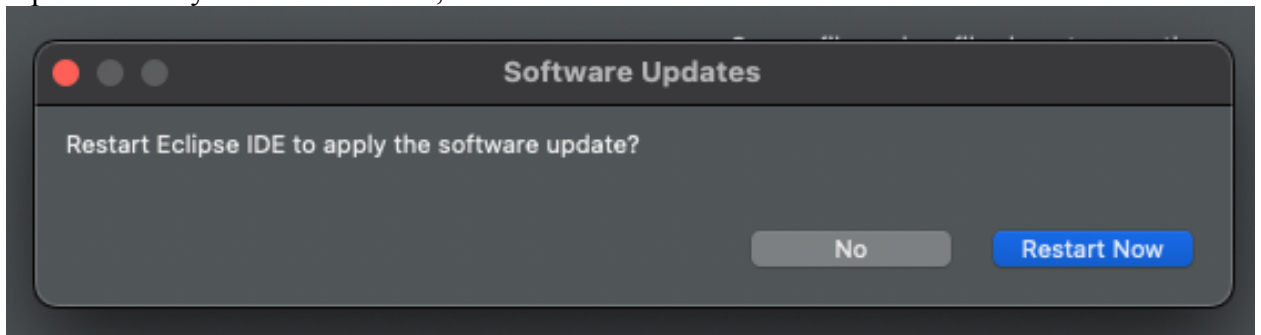

8. "Check" to Trust Authorities, and then click on "Trust Selected" button; this will also take some time and then a new screen will popup again

9. "Check" again on the PGP and then click on "Trust Selected" button

10. Eclipse will ask you to restart. Now, click on “Restart Now”

11. Eclipse will automatically restart

12. So now, you have installed the Spring Boot extension.
